DASHLANE

Welcome to Dashlane

Available on all devices and platforms, Dashlane is an app for storing and autofilling passwords and personal information easily and securely. Log in instantly, fly through forms, and breeze through checkout on every device—at work, home, and anywhere else you internet.

What do I get with Dashlane?

Password manager

Never forget another password. Whether it's your personal email or an internal business tool, Dashlane remembers all your passwords —so you don't have to. Plus, Dashlane's Password Generator automatically creates and saves complex, randomized passwords for you.

Single sign-on

Logging in has never been safer or easier. Single sign-on (SSO) is simple to use, so you don't have to worry about it interrupting your workflow.

Password Health score

Dashlane calculates your Password Health score to give you visibility into your password health, show you which passwords are reused, weak, or compromised, and make it easy to fix vulnerabilities quickly.

Dark web monitoring

Get real-time alerts in the web app when your information is involved in a data leak on the dark web, plus recommended actions for how to remediate the threat.

Separate spaces

With Smart Spaces, you can easily separate work and personal logins, addresses, and notes. Your administrators can set policies about which passwords get sorted into which Space and monitor password health, without compromising the privacy of your Personal Space.

Unlimited devices

Easily log in on any device or platform. Dashlane's Password Manager app securely syncs your logins to all your authenticated devices, including Mac, Windows, Linux, Chromebook, iOS, and Android.

Questions?

Secure sharing

Need to share or store sensitive information? With Secure Notes, you can safely share information with other Dashlane members.

Free Friends & Family plan

Each Dashlane Business user receives a free Dashlane Friends & Family plan to provide up to 9 loved ones with the gift of a simpler, safer internet ($90 annual value).

Service & support

We all need a little support sometimes, and with Dashlane Business, you skip to the front of the line. Reach out to our Customer Support team for your velvet-rope treatment through live chat or by email at support@dashlane.com.

Visit support.dashlane.com for more information about getting started.
