

Business Plus: Go Beyond Credential Management

Detect. Respond. Protect.

Dashlane Business Plus provides real-time visibility into your entire organization's credential risks, empowering you to protect every employee's credentials and prevent data breaches. Enforce the strongest standards with simple security controls in an affordable package.

Stay ahead of threats

Protect your entire organization against credential-based threats with continuous monitoring, real-time alerts, and an organization-wide Password Health score.

Credential Risk Detection

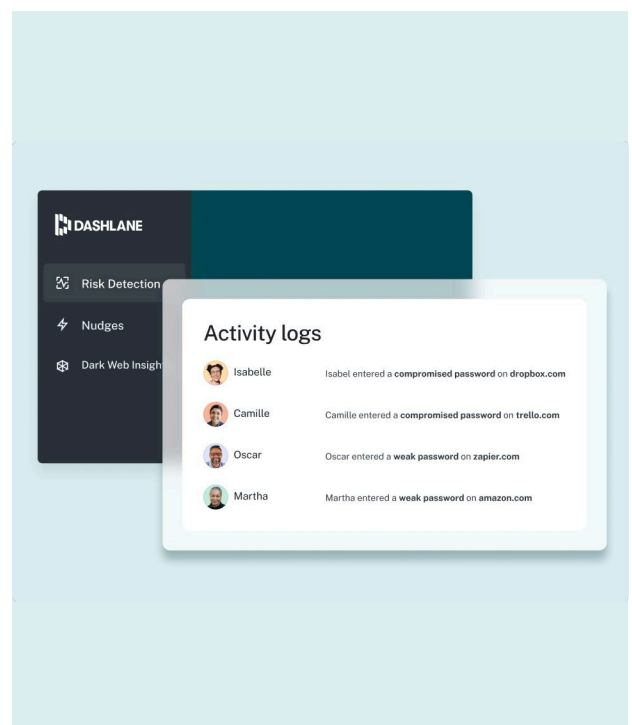

Uncover credential threats across your entire organization, even if employees aren't using Dashlane.

Nudges

Automate risk response to secure weak, reused, or compromised employee credentials.

Phishing Alerts

Keep employees from taking the bait with real-time warnings on potentially harmful sites.

A cost-effective package for the entire organization:

Business Plus is just \$5 per employee per month, billed annually and starting at 100 employees. We also provide personalized support services, dedicated training, and onboarding specialists to ensure Dashlane meets your organization's needs. And businesses are seeing the return on investment:

"It allows us to inform you that an account is compromised . . . and recommend changing it. We know this thanks to Dashlane." Technical IT Manager, Business Plus Admin
